Taxing Wages - Belgium

Tax on labour income

The *tax wedge* is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

Single worker

The tax wedge for the average single worker in Belgium decreased by 0.3 percentage points from 53.0% in 2022 to 52.7% in 2023. The OECD average tax wedge in 2023 was 34.8% (2022, 34.7%). In 2023, Belgium had the highest tax wedge among the 38 OECD member countries, occupying the same position in 2022.

In Belgium, income tax and employer social security contributions combine to account for 79% of the total tax wedge, compared with 77% of the total OECD average tax wedge.

One-earner married couple with two children

The tax wedge for a worker with children may be lower than for a worker on the same income without children, since most OECD countries provide benefits to families with children through cash transfers and preferential tax provisions.

Belgium had the 5th highest tax wedge in the OECD for an average married worker with two children at 37.3% in 2023, which compares with the OECD average of 25.7%. The country occupied the 4th highest position in 2022.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Belgium in 2023, this reduction (15.4 percentage points) was greater than the OECD average (9.1 percentage points).
In Belgium, the tax wedge for the average single worker decreased by 4.4 percentage points from 57.1% to 52.7% between 2000 and 2023. During the same period, the average tax wedge across the OECD decreased by 1.4 percentage points from 36.2% to 34.8%.

Between 2009 and 2023, the tax wedge for the average single worker decreased by 3.0 percentage points in Belgium. During this same period, the tax wedge for the average single worker across the OECD increased slowly to 35.3% in 2013 and 2014 before decreasing back to 34.8% in 2023.

In Belgium, the average single worker faced a net average tax rate of 39.9% in 2023, compared with the OECD average of 24.9%. In other words, in Belgium the take-home pay of an average single worker, after tax and benefits, was 60.1% of their gross wage, compared with the OECD average of 75.1%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Belgium was 20.3% in 2023, which is the 8th highest in the OECD, and compares with 14.2% for the OECD average. This means that an average married worker with two children in Belgium had a take-home pay, after tax and family benefits, of 79.7% of their gross wage, compared to 85.8% for the OECD average.
