Taxing Wages - Chile

Tax on labour income

The **tax wedge** is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

**TAX WEDGE ON LABOUR INCOME**

\[
\frac{(\text{Personal income tax} + \text{employee and employer social security contributions (SSCs)}) - \text{Family Benefits}}{(\text{Total labour costs (gross wages} + \text{employee SSCs)})}
\]

### Single worker

The tax wedge for the average single worker in Chile increased by 0.15 percentage points from 7.00% in 2022 to 7.15% in 2023.

- The OECD average tax wedge in 2023 was 34.8% (2022, 34.7%). In 2023, Chile had the 37th lowest tax wedge among the 38 OECD member countries, occupying the same position in 2022.

- In Chile, employee social security contributions account for the bulk of the tax wedge at the average wage level, compared with 23% of the total OECD average tax wedge. In 2023, personal income tax was 0.15% of labour costs for the single average worker.

- Employers’ contributions are considered to be non-tax compulsory payments (NTCPs) and therefore are not counted as taxes in the Taxing Wages calculations. Please refer to the NTCP report (https://www.oecd.org/tax/tax-policy/tax-database/non-tax-compulsory-payments.pdf)

**Average tax wedge: average single worker, no children**

### One-earner married couple with two children

The tax wedge for a worker with children may be lower than for a worker on the same income without children, since most OECD countries provide benefits to families with children through cash transfers and preferential tax provisions.

- Chile had the 37th lowest tax wedge in the OECD for an average married worker with two children at 5.7% in 2023, which compares with the OECD average of 25.7%. The country occupied the same position in 2022.

- Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Chile in 2023, this reduction (1.5 percentage points) was less than the OECD average (9.1 percentage points).

**Average tax wedge: One-earner married couple at average earnings, 2 children**
Tax wedge trends between 2000 and 2023

In Chile, the tax wedge for the average single worker remained steady at 7.1% between 2000 and 2023. During the same period, the average tax wedge across the OECD decreased by 1.4 percentage points from 36.2% to 34.8%.

Between 2009 and 2023, the tax wedge for the average single worker has been steady at around 7.1% in Chile. During this same period, the tax wedge for the average single worker across the OECD increased slowly to 35.3% in 2013 and 2014 before decreasing back to 34.8% in 2023.

Average tax wedge over time for a single worker

In Chile, the average single worker faced a net average tax rate of 7.1% in 2023, compared with the OECD average of 24.9%. In other words, in Chile the take-home pay of an average single worker, after tax and benefits, was 92.9% of their gross wage, compared with the OECD average of 75.1%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Chile was 5.7% in 2023, which is the 34th lowest in the OECD, and compares with 14.2% for the OECD average. This means that an average married worker with two children in Chile had a take-home pay, after tax and family benefits, of 94.3% of their gross wage, compared to 85.8% for the OECD average.

Employee tax on labour income

The employee net average tax rate is a measure of the net tax on labour income paid directly by the employee.

Employee net average tax rate

In Chile, the average single worker faced a net average tax rate of 7.1% in 2023, compared with the OECD average of 24.9%. In other words, in Chile the take-home pay of an average single worker, after tax and benefits, was 92.9% of their gross wage, compared with the OECD average of 75.1%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Chile was 5.7% in 2023, which is the 34th lowest in the OECD, and compares with 14.2% for the OECD average. This means that an average married worker with two children in Chile had a take-home pay, after tax and family benefits, of 94.3% of their gross wage, compared to 85.8% for the OECD average.

Employee net average tax rate
