Taxing Wages - Türkiye

Tax on labour income

The tax wedge is a measure of the tax on labour income, which includes the tax paid by both the employee and the employer.

Single worker

The tax wedge for the average single worker in Türkiye increased by 0.2 percentage points from 38.2% in 2022 to 38.4% in 2023.

The OECD average tax wedge in 2023 was 34.8% (2022, 34.7%). In 2023, Türkiye had the 19th highest tax wedge among the 38 OECD member countries, compared with 18th in 2022.

In Türkiye, income tax and employer social security contributions combine to account for 67% of the total tax wedge, compared with 77% of the total OECD average tax wedge.

One-earner married couple with two children

The tax wedge for a worker with children may be lower than for a worker on the same income without children, since most OECD countries provide benefits to families with children through cash transfers and preferential tax provisions.

Türkiye had the 3rd highest tax wedge in the OECD for an average married worker with two children at 38.4% in 2023, which compares with the OECD average of 25.7%. The country occupied the same position in 2022.

Child related benefits and tax provisions tend to reduce the tax wedge for workers with children compared with the average single worker. In Türkiye in 2023, this reduction (0 percentage points) was less than the OECD average (9.1 percentage points).

Average tax wedge: one-earner married couple at average earnings, 2 children

Average tax wedge: average single worker, no children
Tax wedge trends between 2000 and 2023

In Türkiye, the tax wedge for the average single worker decreased by 2 percentage points from 40.4% to 38.4% between 2000 and 2023. During the same period, the average tax wedge across the OECD decreased by 1.4 percentage points from 36.2% to 34.8%.

Between 2009 and 2023, the tax wedge for the average single worker increased by 1.7 percentage points in Türkiye. During this same period, the tax wedge for the average single worker across the OECD increased slowly to 35.3% in 2013 and 2014 before decreasing back to 34.8% in 2023.

Average tax wedge over time for a single worker

Employee tax on labour income

The employee net average tax rate is a measure of the net tax on labour income paid directly by the employee.

EMPLOYEE NET AVERAGE TAX RATE

(Employee personal income tax and employee social security contributions) – Family Benefits

Gross wages

In Türkiye, the average single worker faced a net average tax rate of 27.6% in 2023, compared with the OECD average of 24.9%. In other words, in Türkiye the take-home pay of an average single worker, after tax and benefits, was 72.4% of their gross wage, compared with the OECD average of 75.1%.

Taking into account child related benefits and tax provisions, the employee net average tax rate for an average married worker with two children in Türkiye was 27.6% in 2023, which is the highest in the OECD, and compares with 14.2% for the OECD average. This means that an average married worker with two children in Türkiye had a take-home pay, after tax and family benefits, of 72.4% of their gross wage, compared to 85.8% for the OECD average.
